

TOP OF THE MOUNT

OmniMount has introduced its new EAR series. The EAR-C is designed to mount centre channel speakers directly below your screen and has a weight loading of almost 10kg. The EAR models are easy to install, with a universal mounting system that accommodates nearly all flat-panel speakers on the market and works with almost every medium and large flat-panel screen. Perfect for retrofits, the EAR-S and the EAR-C are compatible with OmniMount's UCL-L and UCL-X mounts, all UAM and UAL adapters and the G3FP flat-panel stand.
