

PORTRAIT OF A MONSTER

Monster Cable has released its new speed-rated cables for HDMI in Australia. The new speed-rating and performance system means consumers can be confident that their cable will achieve the very best performance when used with today's most advanced home entertainment components as well as those of tomorrow. To back this up, Monster's 1000HD cable will carry the company's Cable for Life replacement offer. If the cable is ever outstripped by display or source technologies, Monster will replace the cable at no charge.
